Review — Key Points

- **Two important numbers to remember:**
  - Always scan at **300** dpi.
  - The year **1928** is the cutoff for copyright protection. (**1929** on January 1, 2025!)
- **Two file-naming reminders:**
  - Give image files useful, clear names.
  - Give edited images a different name.
- **Your art log is your friend:**
  - Use it for all images, even charts.
  - Update it if you move something to another chapter or eliminate something.
  - Use it to determine if you have a good balance.
  - Use it to track permissions.
- **Keep image files and text files separate:**
  - Identify where an image goes with a note in your manuscript.
  - Word files will behave better if you keep images separate till the very end.
  - If you are working with a vendor, you will hand over hi-res images files separately.
